

NEW

Your Indoor Cycling App

Monitor your training and
save your progress

Connect easily to the Keiser M3i
and access App content by the
main menu.

View your workout data in real
time with a sharp and detailed
design.

Expand your App

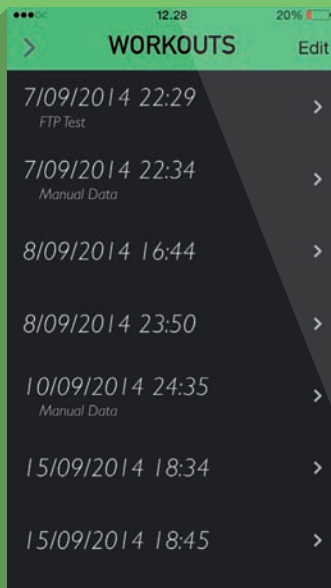

Power training with the
new Test FTP

Compute your functional threshold
power with the FTP Test,
and improve your best results

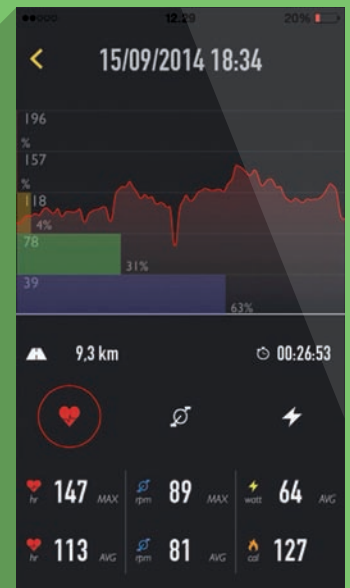

Analyse the results of your workout

Save the results of your workout or FTTH Test with GOind Extended. Keiser M3i users can save results automatically and users of any other Indoor Cycling bikes can save manually.

Graph your results. Customise your graphs by overlaying different variables such as Heart Rate, RPM and Power Output or graph them individually.

A new way to view workout results. Numerical view displays average and maximum workout. Graphic view displays your HR vs your training zones, your RPM's and/or your Power output.

Compatible with:

KEISER® m3i
INTELLIGENTCYCLING.
